

NRENs as Enablers of eResearch

8 October 2013

Leon Staphorst
Manager: SANReN

What are NRENs?

- NRENs are specialised network infrastructure and service providers that exclusively supports a country's research and education communities
- Currently more than 50 NRENs active globally, e.g. Internet2, ESNet, SURFNet, JANET, AARNET, SANReN + TENET = SA NREN
- Most NREN's have CAPEX funded directly from government, OPEX by beneficiaries
- Most NRENs are not-for-profit organisations
- Primary strategy: Quality of Service (QoS) through over provisioning
- Major paradigm shift from commercial networks: Provide as much bandwidth as possible, with as little cost as possible

What are NRENs?

- Services range from commodity Internet services to specialised NREN services geared for science and research (e.g. LightPaths)
- NREN community currently experiencing rapid technology driven changes, evolving business models, innovative service offerings and increased international collaboration
- Technologies ranges from broadband fibre optics to wireless
- NREN community fully supportive of open access and information sharing
- Test-beds for cutting edge telecommunication technology

The Many Responsibilities of NRENs

- **Essential global platform** – platform for collaboration
- **Innovation incubator** – playground for new technologies (see next slide)
- **Demand-side market maker** – students capitalize on NREN platforms to create new technologies
- **Market aggregator** – provide advanced services at lower costs
- **Knowledge multiplier** – catalyst for knowledge creation
- **Economic development engine** – buying power, innovation engine, new market creator, trusted party

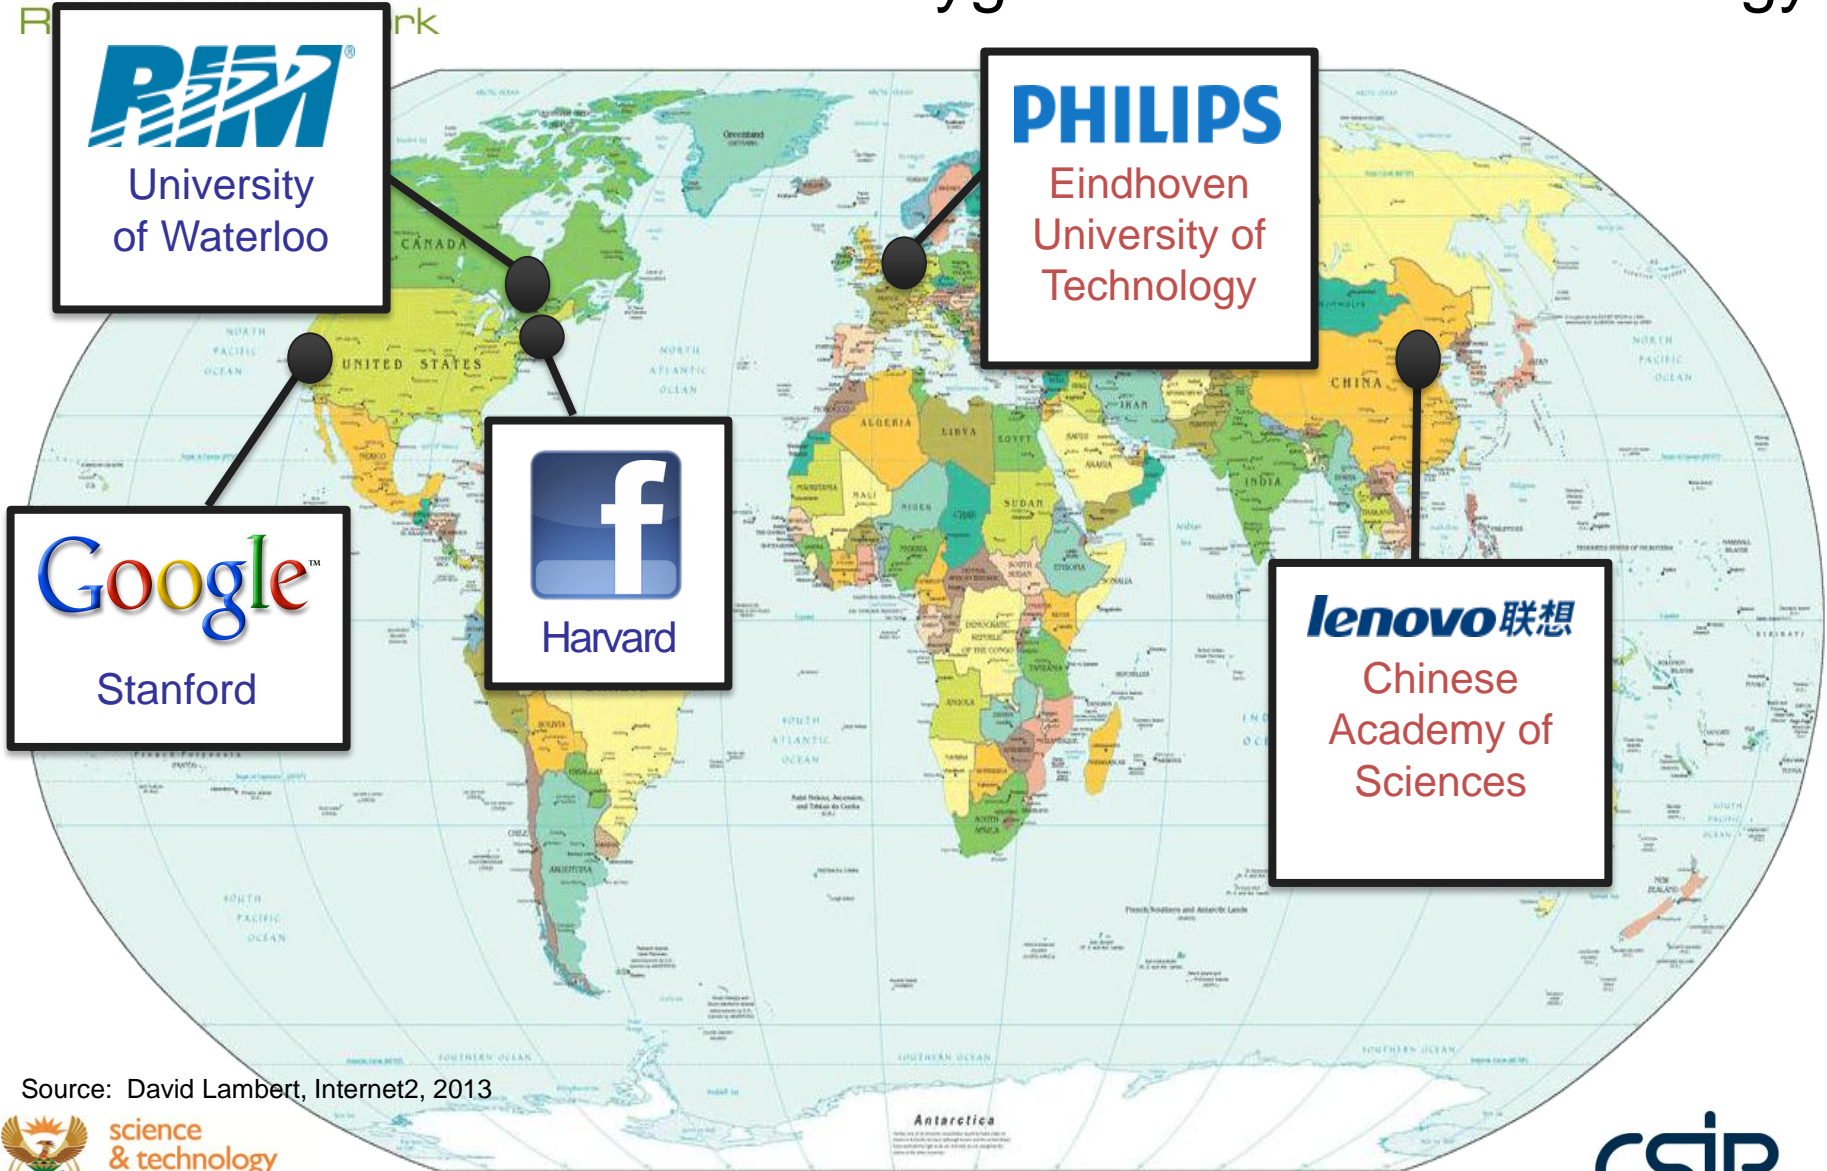

Source: David Lambert, Internet2, 2013

The Many Responsibilities of NRENs

- **Transformation vehicle** – empowers R&E responses to change
- **Collaboration enabler** – provides key technologies (e.g. vID federations)
- **Community developer** – fosters regional collaboration, change ways in which content, applications and services are developed
- **Political stabilizer** – create collaborative relationships that transcend cultures and outlast political regimes

NRENs: Playground for New Technology

Source: David Lambert, Internet2, 2013

- SANReN's mandate:

- Roll-out fully CAPEX funded broadband connectivity to all publicly funded universities, sciences councils and projects of national interest
- HCD and research in broadband technologies
- Develop advanced services (e.g. eduroam, LightPaths, Science DMZs, perfSONAR)
- Custodian for the SAGrid initiative

perfSONAR

- SANReN and TENET relationship:

- Both not-for-profit organisations together form the South African NREN (SANREN)
- SANReN designs, plans and manages the roll-out of the NREN
- SANReN develops experimental services and hands over to TENET when mature
- TENET manages the network and its services on a day-to-day basis
- TENET handles all contracting with beneficiaries, as well as cost recovery
- SANReN + TENET = SA NREN

- SANReN's current reach:
 - 10 Gbps core network, 4 major metro networks, 149 sites with primarily 1 Gbps / 10 Gbps fibre connectivity; SEACOM and WACS connectivity
 - All main campuses of SA universities; research councils e.g. CSIR and ARC; SKA core site; MeerKAT; CHPC; SANAP
 - Current average bandwidth available per site 1.9 Gbps

DST Investment in SANReN

SANReN Sites Connected

Backbone extensions come online (19 sites), RCCP (7 sites) and numerous internal/other projects (14 sites)

■ Number of Sites
■ Projected new connections

Links to Hartebeeshoek Radio Astronomy and CSIR Satellite Applications Centre constructed. Equipment specification and procurement the focus of work in 2007.

SANReN Johannesburg network implemented causing surge in number of connected institutions.

Resources and finances utilised to build the national backbone network. Few sites were connected, but the network now had a far reach and caused major price reductions.

Tshwane and Ethekewini metropolitan areas come online, causing a large increase in number of sites connected

Cape Town network completion and numerous backbone extensions mean the number of new sites connected was the largest yet

SANReN Backbone Network

SANReN Network - Updated 2013/08/29

The SA NREN: Logical Network (Current)

LEGEND: LINKS

- 10 GB Link
- 1 GB Link
- Metro Network
- Satellite Link
- Wireless Link
- International Undersea Links

LEGEND: Colours

- Existing Links
- Tenders currently being evaluated

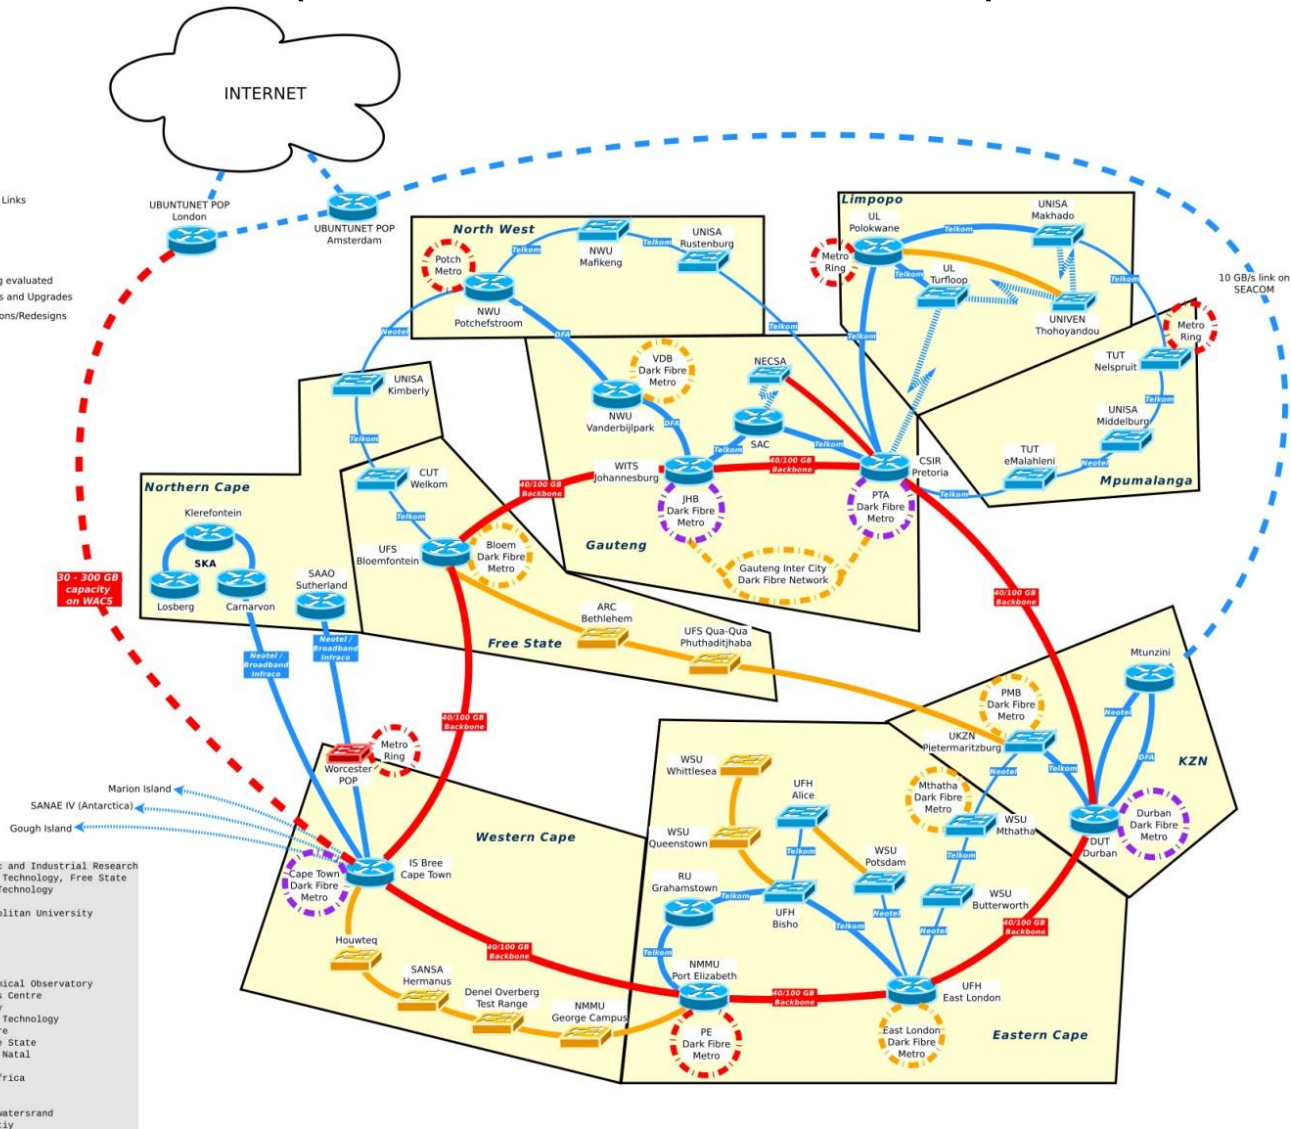

List of Acronyms

- CSIR - Council for Scientific and Industrial Research
- CUT - Central University of Technology, Free State
- DUT - Durban University of Technology
- JHB - Johannesburg
- NMMU - Nelson Mandela Metropolitan University
- NWU - North West University
- PE - Port Elizabeth
- PMB - Pietermaritzburg
- PTA - Pretoria
- RU - Rhodes University
- SAAO - South African Astronomical Observatory
- SAC - Satellite Applications Centre
- SKA - Square Kilometer Array
- TUT - Tshwane University of Technology
- UFH - University of Fort Hare
- UFS - University of the Free State
- UKZN - University of KwaZulu Natal
- UL - University of Limpopo
- UNISA - University of South Africa
- UNIVEN - University of Venda
- VDB - Vanderbijlpark
- WITS - University of the Witwatersrand
- WSU - Walter Sisulu University

The SA NREN: Logical Network (Planned for Phase 3)

- LEGEND: LINKS**
- 10 GB Link
 - 1 GB Link
 - Metro Network
 - Satellite Link
 - Wireless Link
 - International Undersea Links
- LEGEND: Colours**
- Existing Links
 - Tenders currently being evaluated
 - Future Network Rollouts and Upgrades
 - Metro Network Expansions/Redesigns

- CSIR - Council for Scientific and Industrial Research
- CUT - Central University of Technology, Free State
- DUT - Durban University of Technology
- JHB - Johannesburg
- NMMU - Nelson Mandela Metropolitan University
- NWU - North West University
- PE - Port Elizabeth
- PMB - Pietermaritzburg
- PTA - Pretoria
- RU - Rhodes University
- SAAO - South African Astronomical Observatory
- SAC - Satellite Applications Centre
- SKA - Square Kilometer Array
- TUT - Tshwane University of Technology
- UFH - University of Fort Hare
- UFS - University of the Free State
- UKZN - University of Kwazulu Natal
- UNISA - University of Limpopo
- UNIVEN - University of Venda
- VDB - Vanderbijlpark
- WITS - University of the Witwatersrand
- WSU - Walter Sisulu University

The SA NREN's Contribution to Science

- SANReN (and SAGrid) provides support to:
 - MeerKAT, SALT (Connectivity, planning)
 - SANAe/SANAP (Connectivity, contracting)
 - HartRAO e-VLBI (2Gbps light path)
 - CERN / CHPC / Universities (SAGrid assistance)
 - Africa-VLBI (Planning, future Ghana connectivity)
 - Many other (e.g. CSIR, ARC, SANSA)

Consortium for Very Long Baseline
Interferometry in Europe

- SANReN connectivity to SKA sites:
 - 10 Gbps from the core site to CHPC, extended to SKA Cape Town Office @ 1 Gbps
 - MeerKAT connectivity 10 Gbps
- Current SANREN international connectivity to SKA:
 - SKA shares 10 Gbps primary connectivity on SEACOM with other SANReN beneficiary institutions
 - SKA shares 10 Gbps backup connectivity on WACS with other SANReN beneficiary institutions

- Future Large Data Services Enabled through FID:

- Science Gateways and Science DMZs
- LightPath services and GOLE access (e.g. GEANT, NetherLight)
- Computing services via SAGrid and connectivity to CHPC

- Future SANREN international connectivity to SKA:

- Dedicated SKA connectivity starting 10 Gbps (growing to 100 Gbps over 5 years) on WACS for SA and SADC sites
- Dedicated SKA connectivity on WACS to handle potential east coast African sites, such as Ghana
- Dedicated WACS connectivity for KAT 7 / MeerKAT, SALT, Africa-VLBI, CERN and other PNIs starting at 10 Gbps (growing to 100 Gbps over 5 years)
